EDUCATION

- **NAIT (Edmonton, AB)**
 - 2023 – 2025
 - Digital Media and IT – Computer Software Development
- **Hanyang University**
 - (South Korea)
 - (Incomplete, 2 years)
 - 2008 – 2012
 - Completed 2 years of mandatory military service during this period
 - Mechanical Engineering

SKILLS & TRAITS

- **Programming & Development**
 - JavaScript
 - C#
 - HTML
 - CSS
- **Project & Strategy**
 - Problem Prioritization
 - Goal/Requirement Analysis
 - Workflow Design
 - Strategy Development
- **Personal Traits**
 - Critical Thinking
 - Strategic Focus
 - Adaptive Learning

ABOUT ME

INTRODUCTION

Hi,
While I'm early in my IT career, I bring proven experience from diverse professional environments. I understand how businesses operate, how to prioritize what matters, and how to work effectively within teams. Combined with the technical skills and development mindset I'm building at NAIT, I'm confident I can be a strong addition to your company.

EXPERIENCE

2023 – Now | Restaurant Manager (Part Time)

- Manage overall operations, customer service, and staff coordination

Sopoong – Sherwood Park, AB

2020 – 2023 | Class 1 Local / Long Haul (Canada, US) Truck Driver

- Delivered goods efficiently while maintaining strict schedules and solving logistical challenges with great customer service

Various Companies – Edmonton, AB

2014 – 2018 | General Labour

- Supervised teams, performed technical maintenance tasks, and ensured quality standards

City Truck Wash / Lube – Edmonton, AB

2014 | Interior Designer

- Designed soundproof interiors using CAD and 3D design tools

Jaewoo Sonic / South Korea

About Me

Hi,
My name is Soomin Park, and I'd like to share a bit about myself.

I've always been interested in IT, but spent several years in the trucking industry in Canada. After realizing I wanted to pursue my true passion, I left trucking to study computer software development. Since I didn't have a Canadian academic background, I completed Open Studies at NAIT with high grades, earned acceptance into the Digital Media and IT program in Spring 2024, and have maintained a top tier GPA since.

If I were to describe myself in one word, it would be Strategist.

I don't just mean planning, I mean understanding what truly matters before deciding how to build it. When approaching any task, I ask: What's the real problem? What's the #1 priority that cannot fail? I think this development sense, identifying which problems are worth solving and finding the simplest way to deliver value, is what sets developers apart.

For example, when given a project, I wouldn't immediately choose technologies. I'd first clarify the core problem and top priority, then select the simplest, most efficient approach to solve it. This saves time, reduces complexity, and focuses effort where it matters.

I understand trade offs. Every technical choice has costs. Development time, complexity, and maintenance burden. I won't chase elegant architectures or trendy frameworks just because they're impressive. I choose solutions that solve real problems efficiently.

I think critically, looking for what others might miss and identifying potential issues before they become problems. I'm eager to learn from successful products, failure cases, and teammates with different perspectives.

I understand hiring someone without direct experience feels risky. However, my strategic mindset means I won't waste time building the wrong things or overcomplicating solutions. I'll help identify what really matters and deliver it efficiently.

Thank you for your time and consideration.
Sincerely,

Soomin Park

NAIT Capstone Project

Project Overview – ProAthleteMetrics (<https://www.proathletemetrics.com/>)

ROLE

- **Tech Lead**
 - Leads the technical direction of the project.
 - Collects and organizes client requirements.
 - Facilitates team discussions and turns ideas into clear features.
 - Prepares weekly meeting summaries for client/instructor updates.
 - Designs high level product structure and architecture.

CONTRIBUTIONS

- Analyze the client's needs and document to share in the weekly meeting with new ideas.
- Run the weekly meetings.
- Set, create the overall visual workflow of the system.
- Research/Suggests/Introduces the core functionalities to team members with working samples
 - Data handling
 - Rating Calculation Formula
 - Graph Calculation Formula
 - Dashboard
 - Video Upload / Play
 - AI Integration
 - Overall Design and Design Modularization
- Refactoring Code & Redesign Pages
- Test, monitor the overall project and identify bugs and problems.
- Communicate with team leads, identify needs and support.
- Prepares client meeting.
